

06 Quick Start

Freedom Road Ministries — Quick Start

If she has 60 minutes today, here's the next move.

Decision tree

Syntax error in text
mermaid version 10.9.5

The 5-step quick start

Step 1 — 5 min — Pick the next critical-path item from `05_gap_analysis.md`

Lowest-effort open item. Don't optimize.

Step 2 — 30-45 min — Execute

Examples: - Email Clark on Zech verification: 5 min compose · send · log in client-log.md - Hosting call: 30 min discussion · decision logged · DNS plan agreed - Cross-browser QA: open each browser · click every page · note any breakage - First deploy: cPanel upload OR Vercel CLI · verify URL responds

Step 3 — 5 min — Update gap analysis

Mark the gap closed or note partial progress · status · last_audited.

Step 4 — 5 min — Update client-log.md

Per 03_sop_library.md SOP-01, log decisions and changes.

Step 5 — 5 min — Pick tomorrow's

Look at gap analysis · pick the next critical item.

If she has only 5 minutes

Update _knowledge/PROJECT_STATUS_MASTER.md Tier 2 entry T2-E “Freedom Road Ministries Site” with current state.

Voice rules — FRM CLIENT zone (different from Sandi personal!)

This is **Clark's voice**, not Sandi's. Sandi's voice rules don't apply here.

- ☒ Scripture-first framing (FRM is prophetic ministry)
- ☒ Reverent toward Israel · Jerusalem · Jewish people
- ☒ Use Yeshua · Adonai · Elohim · Shalom · Aliyah · Tallit · Shofar
- ☒ Clark's first-person testimony register
- ☒ Replacement-theology phrasing (CRITICAL · always reject)
- ☒ Casual American devotional language (Sandi's filter doesn't apply · but client should approve any tonal drift)

When in doubt about voice, defer to Clark.
